

Gas Grills – Propane Instructions

Grills

Each building has two grills.

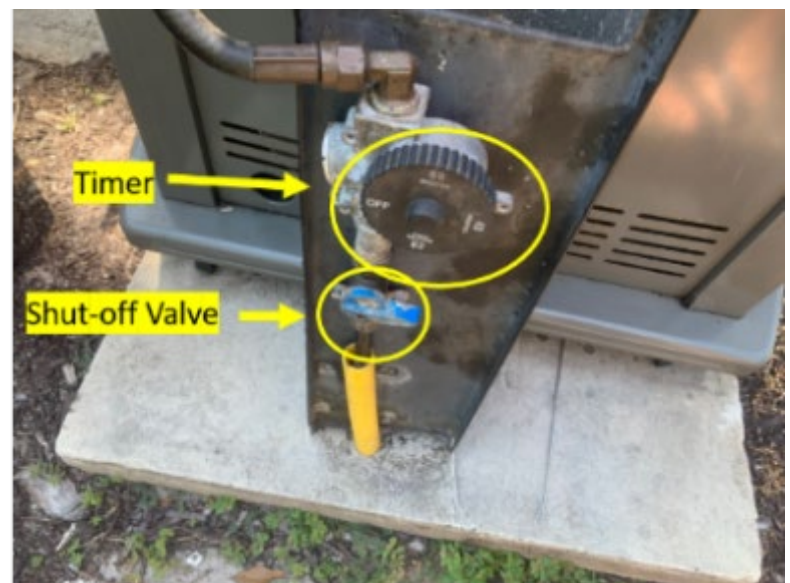

To turn on the grill:

On the back of the Grill:

1. Turn the timer to desired minutes
2. Turn the Blue shut-off valve to the vertical position

Note: The Aruba grills have 2 Blue shut-off valves that need to be turned to the vertical position

Note: At Caribe, there is a second blue shut-off Valve under the light switch on by the garage. Usually this valve stays on, but check if the gas is not working.

3. Open the Lid to the grill
4. Turn the left Burner Knob to high (1/4 turn to the left)
5. Press the Starter Button

At this point you should be able to turn the other burner dials and all the burners should go on.

When you are done.

1. Turn off the Burners
2. Turn off the Blue Shut-off Valve in the back of the grill. Put it in the Horizontal position
3. You don't need to turn off the timer. It will automatically go off

Please Clean the Grill when your finished
